

## HY-AH1

### SPEAKER SYSTEM

The HY-AH1 Anchor Hanging Bracket is designed to support ceiling-suspended speakers from an anchor bolt in order to prevent the speaker's full weight from being directly applied to the ceiling panel. It is used in conjunction with reinforcement hardware supplied with the speaker.

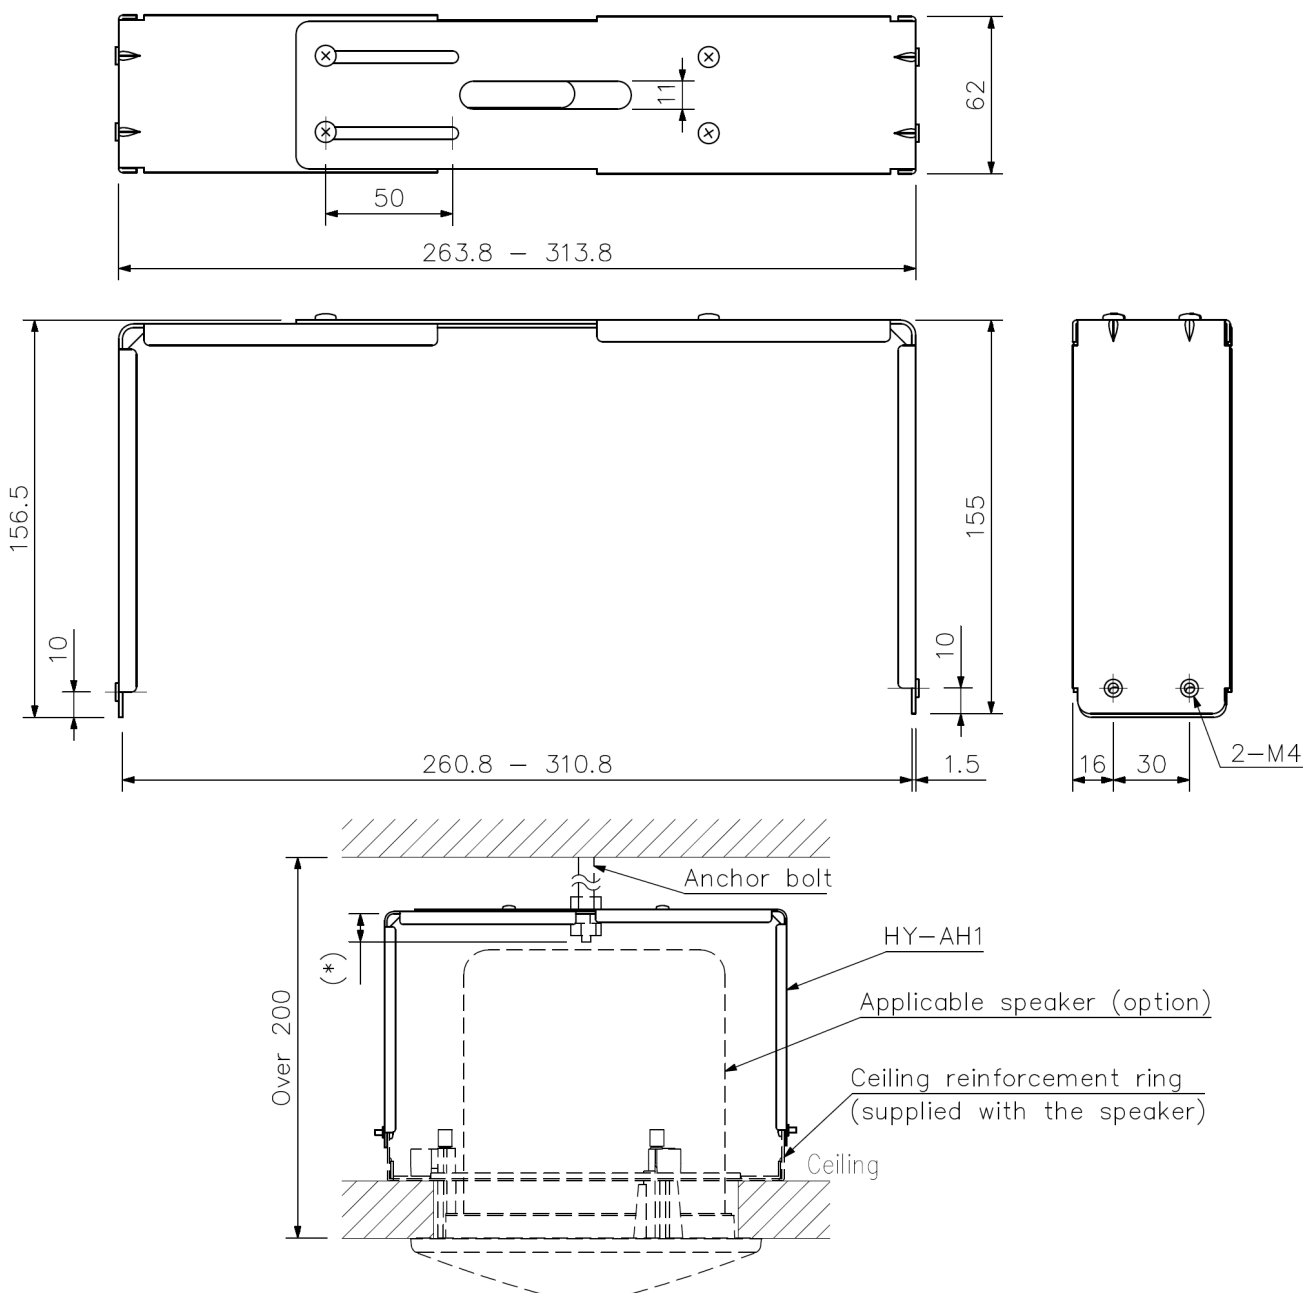

### Key features

- Designed to be mounted to an anchor bolt to prevent the full weight of a flush-mounted ceiling speaker from being directly applied to the ceiling panel
- Finish: Steel plate, plating
- Weight: 700 g

# Specifications

|                      |                      |
|----------------------|----------------------|
| Finish               | Steel plate, plating |
| Weight               | 700 g                |
| Included Accessories | Paper pattern ... 1  |

# Dimensions

(\*) The exposed length of the anchor bolt on which the securing nut will be tightened must be no longer than 26 mm in order to prevent the bolt from contacting the speaker and thus interfering with correct installation.
